Regarding: Study Visit Report of Talent Management VET in Reus,
Spain Reference project number: 2019-1-HU01-KA202-060951

Date: 11.05.2022

Dear Sir/Madam,

STICHTING WAVE EDUCATION representatives participated in the 2nd study visit of the 'Exchange of Good Practices in Talent Management in VET' project on 2nd – 5th of May 2-5, 2022 hosted by our Spanish partner Open Europe in Reus, Spain.

On the 3rd of May, we started at Open Europe office, with introductions of new team members. The next session presented the upcoming activities during our stay in Reus.

After that all participants visited our first activity destination - Escola d'Art i Disseny de Reus. They kindly welcomed and informed us about a summary of topics of our visit. We learnt about the existing facilities and discussed with some of the students. The computer graphics students gladly demonstrated us their final project for graduation. We admired their knowledge and skills. Later on the director of the school and some teachers informed us about the available courses, the career opportunities, the exams, statistics of the school, and so on. We got satisfactory answers to our questions and concerns during the Q&A.

After the visit we had a nice lunch at a local restaurant, and visited some of the best sightseeing in Reus. After the dinner, we observed how Xiquets de Reus practices for the world known Catalan Human Towers.

On the 4th of May, we visited Institut Cal·lipolis and Institut Pere Martell in Tarragona. First, the representative of the complex provided us with a short info session about the Spanish VET model and the facilities of the complex, and afterwards he guided us to the different study rooms of the complex. We visited almost every class and workshop related to Carpentry, Electronics, Mechanics, Pneumatics, and relevant offices as well.

After a short break, we visited Institut Cal·lipolis, more specialized on hairdressing, massages, make-up, nursing and chemistry. The professional representatives guided us between the study rooms while answering all of our questions in detail.

We had traditional Spanish lunch from Tarragona, and visited of some important touristic destinations in the city, including Amfiteatre de Tarragona and Costa Daurada.

On the 5th of May, at Open Europe office we started with presentations on below issues:

- Talent management policies in Spain on the VET field,
- Equal opportunities and talent management for the disadvantaged,
- Spanish methodologies and practices on spotting hidden talents
- Discussion about the methods and realities of all these in the partner countries.

In the afternoon, we received our certificates and the representatives had relaxation.

Sincerely yours,

Director of Stichting Wave Education
