| Description  | A key feature of upper secondary VET is equivalent qualifications for dual and school-based pathways: work-based learning forms a large part of the programmes in both. The system also helps learners progress. Its four-level structure enables many students to move up the education ladder.  |
| Main Results                                       | VET in the Netherlands has good labor market outcomes, with relatively low youth unemployment. The VET system is among the world's best, as it is both comprehensive and highly flexible.   |
